

Jujube drying equipment

Advantages of Leader jujube drying equipment :

1.Valid

Our drying equipment is automatic.Obviously, it can save you labor investment and work more efficiently.In addition, it can work 24 hours a day without interruption.Working continuously saves you time to warm up and energy costs.In addition, our jujube drying machine can be used to handle a wide range of materials, and its wide application also makes our dryer more cost-effective.

2.Durable

The machine body is made of precision casting alloy material to improve wear resistance. In addition, the machine is easy to operate, easy to remove and replace small fast wear parts, both economical and simple.

3.Safety

We use PLC control system to monitor operation process at any moment,which could ensure the safety of workers.Our machine will not produce any hazardous substance at run time,it ensure that the plant is ecologically friendly to the surrounding environment.

In addition, the whole jujube drying equipment works under the condition of complete sealing, and the leakage amount of microwave energy is far lower than the international safety standard.That is to say, the machine is safe for workers and the environment.

4.custom design.

Leader has extensive experience in designing, manufacturing, exporting and installing jujube drying equipment worldwide.Our team consists of many experienced engineers and technicians.Therefore, according to your budget, raw materials, local voltage,we can provide you with the most cost-effective jujube drying plan.

5.Complete service system

At present, Leader microwave equipment company has formed a comprehensive service system from presale consultation, installation to after-sales service.At the same time, we have set up

eight overseas offices to serve our customers on time. Please contact us for more details!

6.A tractor serves several purposes

Our jujube processing equipment not only can dry a variety of materials, but also has a strong sterilization function. Therefore, it is a typical design of a single machine with multiple purposes.

7.Long service life

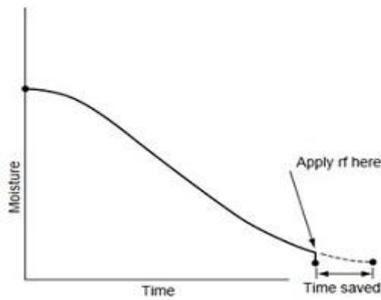

In order to ensure the quality of the equipment, our jujube continuous drying equipment has introduced special materials and unique double-layer design, so that jujube drying equipment has a larger space and longer service life.

In order to meet different requirements of customers, Leader designed a series of jujube drying equipment for sales. In addition, jujube drying equipment is suitable for processing all kinds of materials, such as rice, flour and other foods, medicines, medical raw materials, tea and so on.

			
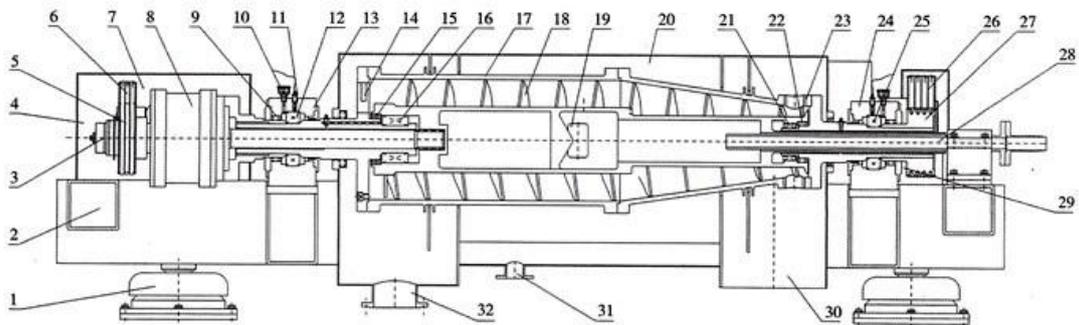

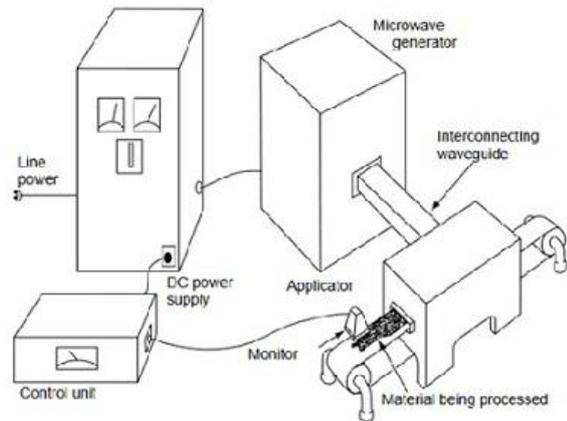

12kw Jujube drying equipment	30kw Jujube drying equipment	50kw Jujube drying equipment	Customized jujube drying equipment

Model	DL-12 KW	DL-30KW	DL-75KW
Microwave frequency	2450/915MHz	2450/915MHz	2450/915MHz
Output power	12 KW	30 KW	75 KW
Transmission speed(adjustable)	0-5m /minute	0-5m /minute	0-5m /minute
Leakage value	≤3mw/cubic metre	≤3mw/cubic metre	≤3mw/cubic metre
Size (mm)	7000x840x1800	10500x840x1800	13500x1200x1800
Drying capacity	120-150kg/h	300-400kg/h	500-600kg /h

Boost drying with Microwave Dryers

Finish Drying with Microwave dryers

Chinese jujube is delicious and nourishing fruit. However, fresh Chinese jujube is liable to rot and drying is a necessary process. Fruit rot after harvesting has always been a serious problem for Chinese jujube, leading to short shelf life, inferior quality, and poor economic benefit. Drying is the best choice to solve this problem for most cultivars except those particularly well suited for fresh eating, such as “Dongzao” .

Traditionally, sun drying is applied to jujube drying, which has the advantage of no professional equipment and easy operation. However, sun drying is also easily influenced by weather condition, long drying time and danger of contamination.

Our jujube drying machine is committed to improving drying efficiency and quality under the premise of low carbon, environmental protection and resource saving. This idea and initiative will help solve environmental problems. In other words, investment in microwave jujube drying equipment can contribute to the improvement of our environment.

Of course, it is also a very profitable business opportunity. If you want to buy a jujube drying equipment, please contact us immediately!
